

- John the Baptist Community School
- Teaching for 28 Years
- English Associate with Junior Cycle for Teachers
- Feel I needed to upskill

What I learned about and how you used the tools and strategies presented in the modules....

- Compulsory ICT module. Prezi- Blogging- for my own lessons, Department presentations, and in turn students used for presentations.
- Dipped into see the others but chose Assessment Toolkit and focused on using rubrics and Kahoot!

A more flexible approach

Learning in my own time from my own home at my own pace

Tutor support - quick responses to problems encountered

Practical- the applications and strategies learned were useful and easily applicable for me and my students

- Largely my own issues- e.g. my daughter has dancing on Thurs  
 Running the Webinars twice to avail of the real time discussion rather than logging in once discussion is over.
- Meeting before hand to introduce to 'luddites' who may have concerns.
- More options to connect with other teachers

- Feedback on some components either from tutor or peers
- Evaluation before and after
- Opportunity to lead a session- learning by teaching
- Opportunity to become an e-teacher
